Searches Out Of Shift Analysis

Data Review of Eugene Police Department Public Local Flock Search Audit Records

Sept 23, 2025 Seth May eugenecitfoia@gmail.com https://eyesoffeugene.org/

Full audit log data can be found in the public GitHub repository https://github.com/eyes-off/eugene-oregon/tree/main/FlockAuditLogs

Summary

This file lists statistics and data intended to identify any inconsistencies or possible anomalies in the Eugene Police Department's (EPD) use of the Flock Safety system. All data can be found in the public local flock search audit records found on the city's transparency portal (https://transparency.flocksafety.com/eugene-or-pd). Since records are only for the last 30 days, this report is based uses archived versions of the data (see GitHub for the full dataset).

About the Data Sets

A Note About Dates - Date/Time values found in the original audit data downloads is in UTC time. To make the data more useable locally, these values have been shifted to PST. Please note the PST addition to the column heading specificly identifying shifted data.

Searches Out Of Shift - A list of events where two searches should not be occuring, based on shifts. These indicate that searches may be happening while officers are off-shift. 28 events have been identified across 20 unique users, enough to indicate inapproriate usage may be occuring.

Shift Rules - Rules for the analysis are based on EPD shift information as found https://hiring.eugenepolice.com/about-eugene-police-department/. This information shows 6 different 10-hour shifts. Based on these shifts, rules have been identified to show that if a search happens during one period of time, later searchs should not appear during certain blocks of time.

Searches Out Of Shift

Based on rules related to officer shifts, if a shift happens
